**Assignment 1**

1. So for example if you have an assignment and something to review or accept:

2. Set review status on the item to be reviewed:

3. Click **Enable** then **Submit**

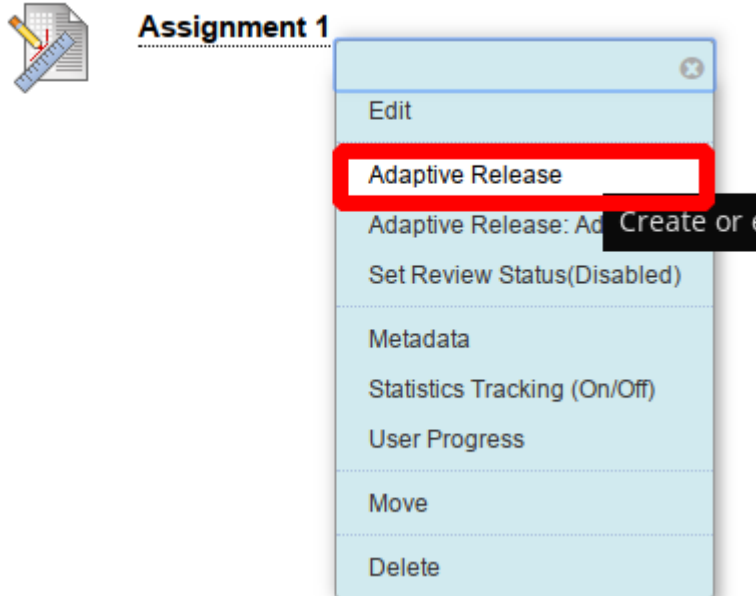

**REVIEW**

*If Review is on, users will have the ability to mark this item as Reviewed. If Review is off, no option will appear.*

Review  **Enable**  Disable

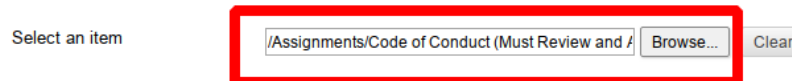

- Next create an **Adaptive Release** on the assignment (**NOTE YOU WILL HAVE TO DO THIS ON EACH ASSIGNMENT**)

- At the bottom there is a **Review Status** click **Browse** and find your item  
**REVIEW STATUS**

*This content item is visible to all users until a Review Status criterion is created. Selecting an item will permit users to mark that item as reviewed.*

- Click **Submit**

### Optional: Disable Mark Unreviewed using JavaScript

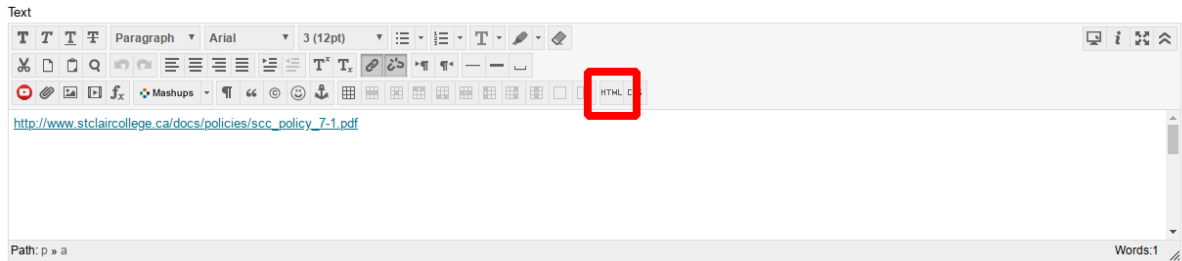

Now the one little problem is they can mark unreviewed, however the assignment will also disappear if they do so. If you're ok with that, that's fine if not you can do this last optional part to use javascript and stop students from marking as unreviewed.

- Edit** the item you want reviewed:

2. Click **HTML** on the text portion

3. Add this to the end (copy and paste from this guide):

```
<script type="text/javascript">
jQuery(document).ready(function(){
markUnreviewed = function(){
alert("You cannot unreview content");
}
});
</script>
```

4. To look like:

5. Click **Update** then click **Submit**
